

APPENDIX:

Una Europa Global Sustainability Advocate Certificate 2025

Una Europa Global Sustainability Advocacy is awarded to those who have completed the following mandatory courses and two out of four elective courses (specified in the certificate).

MOOC (Massive Open Online Course) is an online course where students study independently at their own pace and complete mandatory assignments. All courses apart from the UnaVEx Virtual Exchange are MOOC-courses.

Mandatory courses:

UnaVEx Virtual Exchange

Una Europa Virtual Exchanges for Sustainability consists of five interactive online sessions, where students from Europe and Africa meet, share their perspectives on sustainability, and co-create sustainability action together.

Introduction to Sustainability MOOC (ATM385, 3 ECTS, University of Helsinki)

Learning outcomes:

After the course, the student is familiar with sustainable development as a political and normative concept, and recognises its ecological, social, economic and cultural dimensions and the connections and conflicts related to them.

The student understands that sustainable development and the wicked problems related to it, such as climate change, require multidisciplinary cooperation and problem-solving skills.

The student understands the significance of individual agency and global responsibility as well as the need for comprehensive transformation.

Elective courses (student has completed at least two out of four courses, selections are specified in the certificate):

Climate.now MOOC (ATM386, 2 ECTS, University of Helsinki)

Learning outcomes:

Having studied the course, the student can look at climate change from many different perspectives and create connections between them as well as look for solutions to the climate challenge in a variety of ways.

Reflect on his or her own role in climate change and apply what has been learned on the course to his or her field of study.

Examine different perspectives, solutions, information sources and the current debate on climate change critically.

Biodiversity.now A MOOC (FAF-101A, 2 ECTS, University of Helsinki)

Learning outcomes:

After completing the course the student is able to recognize reasons for the ongoing biodiversity crisis and its consequences to the human society and personal life

Explore own connection to nature and diverse values one assigns to it

Recognize a variety of approaches and tools to maintain and enhance biodiversity, and promote sustainable use of biodiversity

Apply expertise from own field of studies or work and learn how to be part of the solution to the biodiversity crisis

Political Economy of Sustainability MOOC (ATM387, 2 ECTS, Uniwersytet Jagielloński/University of Helsinki)

Learning outcomes:

The student will understand the mechanisms in which contemporary economic system leads to environmental, social and financial unsustainability.

Will be aware of principles and solutions of alternative economic modes, including degrowth and circular economies.

Will be able to evaluate critically economic strategies, production structures and governance of businesses and trade in terms of the sustainability.

Will recognize the methods of analysis and design of sustainable organizations, policies and strategies.

Sustainability and the Arts MOOC (ATM388, 1 ECTS, Università di Bologna/University of Helsinki)

Learning outcomes:

Students will learn about recent artistic responses to issues of sustainability as they have been developed by contemporary visual artists, architects, filmmakers and media professionals, as well as within social movements and activist practices.

The student will understand the social and political role of images in the ecological crisis and how the arts are more and more involved in developing responses to dominant narratives, or else in developing counter-discourses that might eventually have a deep impact on the collective unconscious and on transnational policies.

The course is based on an interdisciplinary approach at the crossroads of visual studies, cultural studies, contemporary art history, contemporary architecture history, film and media studies, and political theory.
